Title:

Comments: This is not something that needs to be in the wilderness. There are old growth trees and wilderness and beautiful habitats that are at risk of being destroyed. Please do not build this in the Sandia Mountains. Mountains are meant to be natural and there should not be a coaster. If the ski area needs lifts please, find another way. This is not how the mountains and the earth should be treated. Think not of revenue but instead of preserving this earth while we have it as climate change continues and increases daily. Please reconsider and reject all project ideas from moving forward in the Sandia Mountains.
