Comments: I am in favor of having giving wild horses more land. Nature takes care of overpopulation because there are predators in the wild. I am not in favor of giving more access to cattle ranchers and lumber companies. They have longed complained about giving access to wild horses because these horses use land these industries want for profit. They make up stories that the horses are eroding the land, when in fact, cattle grazing and lumber cutting are what is destroying the wilderness. It's just about money for these industries, and the government should not put profit over wildlife. Once the forest and wildlife are gone, it doesn't come back. I am not in favor of the wild horse roundups that are done by the BLM. This is an indiscriminate and cruel way to round up horses and many are injured and family groups are separated. Also links to the texts about the new proposed management plan don't open--I could only access the videos.
