Comments: I have a cabin in the Forest Lakes area and I love to see the horses. But the number of horses has gotten to be a problem. They come onto my property and eat my plants, defecate in the yard which is a health hazard to my dog. I believe the number of horses needs to be drastically reduced. The horses cross Hiway 260 on a regular basis creating a accident problem for users of the roadway. Signs are in place but the horses typically cross the road in the dark and can not be seen in time to avoid a collision.

Years ago the number of horses was not a problem but they have proliferated to the point they are effecting the other wildlife in the area, consuming food and scarce water. Please take the necessary action to drastically reduce their numbers and the appropriate action to control their numbers into the future.
