Comments: I do not want domestic livestock grazing on lands that I pay taxes to manage! Management is not eradication. If you can't manage wildlife including wild horses than you have no business being in charge of them! With over 600000 acres, a herd of 250 horses will not affect this area one iota!

The American people are sick and tired of the mismanagement of our wildlife and you offend me with this plan. I strongly suggest you rethink this plan which will affect the genetics of this herd!

It might be wise to remove some cattle as there is a killer of animals on the loose in this area and it's very possible that cattle could become the next target if this plan goes through!
