Comments: Horses have been on this continent for thousands of years! Most people do not know that but you can look it up. I agree with Vicki Halvorson Cook. Get the cattle off public land! This WILL hurt Tourism and you should care about that because people stay in your hotels, rent cabins, dine out and all the while spending money. Someone needs to be smart enough to protect the horses. They are American icons. Do not destroy the West and all of God's wildlife! Since when do we provide public lands to grow cash crops. I want a large piece of our public land to allow horses to be free. Ranchers are raising cattle on our public lands, so let's all get our piece of that 666,000 acres. Do not round up or kill those horses!
