Comments: I wanted to take a moment and give my support for this project. My wife, son and I all use the Sandia Ski Area for hiking all throughout the spring and summer. Our favorite picnic spot is located on the slopes on a flat spot in between the Prohibition and Exhibition ski runs.

That said, I have read a few dissenting views about this project, specifically talking about the environmental impact. Personally, I do not see how the addition of a coaster into an established ski park connected to a functioning tramway is going to cause any significant changes to the surrounding areas. The planned location is already fairly well occupied by hikers, bikers and tourists from the tram.

I hope this project is approved and completed soon, my family and I are looking forward to adding a coaster ride to our weekly hike!
