Title:
Comments: No more gathers or roundups leading to terrible abuse, and deaths. If sterilization is needed, perhaps PZP injections(birth control) can be effective. No surgical procedures on mares where some of course would bleed to death, suffer huge pain, or die of infections. Also perhaps stallions could be anethesized and gelded. No more rounding up and putting in crowded dirt facilities with no sheltering. That's so cruel. Its time to lower numbers of cows which create greenhouse gasses. Humans do not need to eat meat.
