Comments: Such a Shame is the only Words for this..These Beautiful Creatures are not hurting anyone or anything..We spend summers up there and Enjoy finding and documenting them..very upset at all this, on throwing our History away. Whether you believe that is not the Point they are protected by Law .And the people should have a say in their Life and living it in the wild ! Your Land is not damaged any more than with the Cows.Cows just lay and suck the water tanks dry from other animals. .Only thing is they make you money! Why cant FS work tonprotectvthem instead of rid them? All sides of this story , Advocates and all Agencies work Together instead of the Roundup way! But the horses up there and everywhere dont deserve this..they deserve Better..Roundups are so costly and not working finds ways to make it Better not Worst! People come from all over the World to see Wild Horses and we should be helping them to stay! They do bring on lots of money in different areas! Economy!
