Comments: I am writing to oppose any and all measures to eradicate wild horses!

What happened to this land is your land this land is my land this land belongs to these wild horses!!

These horses are part of our echo system they were here long before humans were here.

I am against removing any wild horses from the land that they freely roam. In fact wild horses protect us from wild fires by allowing these beautiful majestic animals to graze public lands! I strongly object

Any removal of wild horses.
