Comments: Please do not implement this plan... the herd needs to be at least 200 horses to maintain healthy genetics per recommendation of a well known horse geneticist!! Horse numbers can be managed safely with darting mares so they don't conceive!!! This has been demonstrated by other wild horse management areas!!! Stop this reduction of wild horses... instead protect them from so they live peacefully as the law requires. Why has law inforcement not caught the person shooting them with a gun? That person is breaking the law and nothing has been done!!! Save the wild ones and let them live!!!
