Comments: PZP birth control should be used to manage herd populations. Systematic roundups, holding, domesticating, shipping for slaughter is inhumane and counter productive to the desired outcome of reducing population numbers. Stop spending millions of tax payer dollars on something the majority of Americans are against. PZP is a proven cost effective humane method to reach the desired outcome. Private/ government for profit industry shouldn't be allowed to exterminate an American icon, our symbol of freedom, our wild Mustangs and Burros, for monitory gains.
