Comments: I am opposed to the Sandia Mountain Coaster. Our mountain already suffers from the carbon monoxide emitted by visitors to the mountain which is located so close to a major metropolitan area. Have mercy on those trees. More traffic during the summer season will certainly take an additional toll on the overall health and welfare of the mountain flora and fauna. Sparks from the coaster could be the ignition point for a forest fire damaging so much which could not be replaced in one hundred years. So please don't do it. The mountain belongs to all of us. I don't want to look up and see her burning for the benefit of entertaining. If you want to improve the land for hikes and contemplation, ok by me. To fly through the trees with the greatest of ease and the chance of harming mother nature, no.
