Comments: Americans want and deserve areas where outdoor recreation is not populated by motorized vehicles. Please keep the Rapid River free from motorcycles crossing its upper reaches. For the last decade this wild and scenic area has been a place where outdoor recreationist can enjoy peace and beauty without the noise and degradation from motorized vehicles. Offering a compromise of "turnarounds" hasn't worked in other areas such as Hells Canyon where they've been breached. Let's not go backwards. Thank you.
