Title:

Comments: I believe the Rapid River Trail, and all connecting trails should remain Non Motorized and Non Mechanized. There are so many other trails for these users, but so few for ONLY hiking/backpacking and stock use. Signs at boundaries and turn around areas will NOT prevent these users from accessing the Wild and Scenic corridor, and the NRA. If you do premit these users, will you hire/train/fund additional LEO positions to ensure this unique and dearly loved drainage is not abused?
