Title:
Comments: Please take a look at all the options for these beautiful wild horses. The round ups of the past are outdated and cruel. There are modern and humane ways that can be used in 2021 to control the wild horse population. PZP darting has been proven to work on other wild horse bands. It controls the population and is completely humane. Round ups where there horses are terrified by running them into holding pens, being separated from their families, possibly injured during the process is such a brutal and old fashioned way of controlling the population. These horses are then held in holding pens for long periods of time until their fate is decided. Sometimes it's the slaughter house, sometimes adoption and sometimes they are left to sit for years. Please look to PZP darting so these horses can continue to roam on their protected land. There are plenty of supporters of these horses that are willing to donate their time and efforts to help in any way possible. Thank you and please look at other options for these wild horses.
