Title:

Comments: Based on the information presented and my knowledge of the herd, I believe Option 1 - NO ACTION, is viable. The horses are all in good condition and there is plenty of space and forage for them. I have not seen a large increase in horse numbers over the past 5 years that i have been following the herd. In fact, due to illegal slaughter, several bands have been murdered in totality. I recommend Option 1 - NO ACTION at this time.

Thank you for presenting the information and allowing us to read and respond.
