Comments: I'm writing in reference to the God awful proposal to allow motorized vehicles into the boundary/corridor area of this amazing place in MY HOME STATE. Will we ever stop the invasion into our most beautiful spots in our State? Nature is best enjoyed on foot or bike. Being able to LISTEN to nature has been one of my favorite things to do as a kid playing in the Idaho woods. Open up these trails to motos will only bring more trash, loud noises, pollution and spoil the natural beauty God has blessed us with. Heck, maybe some people will get off their butts and enjoy human powered sports as you enjoy the woods. There are literally 1000's of miles in Idaho to take your motorized play toys. There are less and less places to go and enjoy nature via hiking or biking. Don't continue down the road of thinking in the present, keep these sacred places as they are for our future generations.

Thank you for your time.
