Comments: A "mountain coaster" is the worst idea! It will drive up traffick in an area where people are not careful about how they drive, endanger wildlife, increase pollution, ruin the skyline of our beautiful mountain, damage the ecosystem of countless plants, be a drain on already taxed resources, and be an impediment to the enjoyment of NATURE, whichbis why people go to the Sandias to begin with. There is a roller coaster/theme park in Albuquerque, we do not need one one the mountain. I teach classes on herbalism and ecology in the Sandias and I think this coaster will be nothing but problematic. There is no need to innovate and technologize all over one of our only accessible wild places. Please, please, PLEASE!!! DO NOT PUT A ROLLER COASTER ON THE MOUNTAIN!!
