Comments: Sandia Peak does not need more development, more noise or senseless entertainment at its peak. A roller coaster is not the way to enjoy the incredible views, nature or being with people that the mountain already affords. As a citizen who uses the trails frequently, I am concerned about the additional 20,000 to 30,000 vehicles driving up to the peak. Additionally, should this be a failed economic initiative, the environmental impact, the eyesore, the noise, will not be worth the 3 minutes of fun.
