Comments: I do not believe a coaster on the Sandia Mountains would be a good idea. The pollution of the 20,000-30,000 more cars going up there each year would be disastrous for the environment. Not to mention the noise pollution caused by the ride for all those visiting the ski resort or hiking and hoping to have a peaceful mountain experience. The juxtaposition just does not quite make sense, and while it may be lucrative in ride tickets I think you'll see a decline in those other visitors. I don't think the sound of machinery and screams quite compliments the beautiful mountain experience. I have taken the incredible lift up the mountain, and I think that serves as a perfect roller coaster ride in itself. The whole scenery was so beautiful, informative, and the sunset so peaceful from the mountaintop. Would be a shame to see that go to waste.
