Title:

Comments: Please do not build this. This will increase traffic to and from the peak immensely. An increase in car traffic is going to increase the negative impact on wildlife. Not to mention, the added foot traffic is going to create more pollution in the mountains. New Mexico has the best mountain ranges. Part of what makes our mountains so beautiful and special is the fact we are not in a densely populated state. We have been able to preserve a lot of wildlife because of that. There's no point in going up to the peak if it resembles the city below.
