Comments: Hello,

Please don't build this. It will destroy the habitat, what little animals we have left on the sandias, create more traffic, have a major effect on the neighborhood. We and the rest of the people that live next to the mountain have a quite peaceful area away from high traffic areas, thats why we buy house here. This would be greatly impacted as well, its so peaceful here, the deer, rabbits and hearing the coyotes at night is what makes living over here amazing. This coaster company will profit off this , not anyone else,, and that is their goal, not to make nature better or help the local area, our small community was intentionally built here for peace, quite and enjoy what this mountain had to offer. Our specific neighborhoods pay and create associations to protect these mountains and cherish this moutian, this will destroy the area while we will carry the brunt of the negative consequences. It will definitely have a high impact on everyone here and all the nature that lives here. It is literally the only wooded area we have in Abq. Why would we want to destroy in more? It's beautiful and should stay that way. On top of all that, the company will profit, we get nothing but trouble and frustration in the comfort of our home. Home and nature should be peaceful. Please don't let this happen. Thank you so much
