Comments: Hello,

I'm writing to voice my opinion and why I oppose the mountain coaster that is being considered on Sandia mountain. It does sound fun, don't get me wrong. But how long would it stay popular before it dies off and no one wants to go? It would definitely disrupt wildlife in the area, and the elk population just started to return. We have to consider that land as the land of wildlife as well! The roads up the crest are already not in the greatest condition, having more cars travel the road will not only hurt the wildlife population, the roads would become a bigger problem and need constant maintenance- which is a problem all over Albuquerque already, let's leave that problem in the city and not extend it into the beautiful mountains. If tourism attraction is what you want, I'm sure there are better ways of accomplishing that without hurting the beauty of the state, and in long terms would even attract more than a rollercoaster.
