Comments: This is not a good idea. Not only is this mountain sacred to the original people of this land- the Tiwa People, this is an insult to all who live and have connection to this space. Not just the Tiwa people but even those who "recreate" on the mountain. There is so much negativity you'll be creating with this project. From environmental impacts, to disrupting animal habitats, and again, a complete disregard to the Tiwa people who's mountain this actually is. Do the right thing and stop this project now. It is not a good idea. I repeat, it is not a good idea.
