Title:

Comments: This is the stupidest thing I've ever heard of. This forest deserves respect, stewardship, and attention to the future well-being of both plant and animal life. We live in an extreme climate and the ecosystems we interact with should be treated with care and delicacy. Forests are not here to be developed into theme parks! The kind of tourism you solicit will feed into people's behavior in the location overall. If you invite theme park tourism, do you seriously expect people to engage with the surrounding forest respectfully? You are inviting exacerbated sound + traffic pollution, litter, development and paving of surrounding areas. you are inviting people to behave as if our precious natural environment is a playground for their immediate entertainment. Save roller coasters for cities-this is literally a nightmare plan and will have devastating consequences on this land that is held in public trust.
