Comments: There must be an environmental review to decide if this project should go forward. I value the quiet sounds of nature, wildlife viewing, and aesthetics of the natural landscape and the coaster would eliminate that in the surrounding areas. I do not believe the landscape can handle the large increase in traffic in a such small area and would hugely impact wildlife negatively. Any cutting of trees in the project area or other carbon impact, or natural resource impact needs to have a compensation plan. We need our forest, especially in these times of drought.

I do not believe this coaster is a good idea.
