Comments: A roller coaster on a sacred mountain on stolen land is exactly what New Mexico does not need. While indigenous people were dying at higher rates from a Covid because they have no running water to homes on some Pueblos...who thought this was a good idea? It adds insult to injury when we should be focused on healing relationships within our community; not exploiting land for entertainment value. This is not our land. It needs to be returned to native people, not crafted into another meaningless toy for rich white people. Get a conscience, or is the bribe from the ski industry too big for you to care?
