Comments: I oppose the construction and operation of the mountain roller coaster. There isn't any benefit of this coaster and will create more damage and displacement of the natural environment and wildlife. As an avid hiker and climber, I want to preserve these places and not disturb the environment. The mountain and outdoors are for us to reconnect with the natural world and not commercialize the area further. More traffic in the area will increase more potential deaths to the wildlife, also will draw more trash as people still can't manage to pack in and pack out. Shame on Sandia Peak for capitalizing on the outdoors further.
