Title:

Comments: This proposal lacks tact, diplomacy and accountability. The proposed site is and has been for generations a cultural and religious center for many indigenous people of this nation. This is considered desecration, would you have proposed this development on top of the sistine chapel? A re examination your worldview is in high need. The land is not empty in want of a cheap thrill. It is one of the last homes to the wildlife in the area, one of the last places in the south west our children and grandchildren will be able to know that has yet been untouched by human hands and human greed. To continue with this will be to demnify the legacy for future generations.
