Comments: As a member of the community, I am confident saying that we do not want our mountain to be an attraction. What makes New Mexico true and special is that it had not been commercialized and commodified to make money. What we love about this state is that it is still wild in many ways. We do not want the Sandia Peak Ski Area Mountain Roller Coaster. This kind of development would be disrespectful of the Sandia Pueblo who hold this mountain sacred. They have already been disrespected when they lost the mountain to the forest service in the 90s. Installing a roller coaster only continues to perpetuate injustice towards the First Nations people of New Mexico.
