Comments: hello, I am writing in regards to the Sandia Peak coaster. I think this is something that would not be beneficial to our community, especially the wildlife up in the mountains. Roller coasters are very loud, use a lot of energy, and not to mention the influx of locals and visitors going up into the mountains and affecting the wildlife. I think that if the City and State want to bring something new to Albuquerque, they should just put money and efforts into expanding and re-designing Cliff's Amusement Park. I do not see a point in adding one single roller coaster in the middle of our Sandia Mountains when we have a local amusement park that has been a part of Albuquerque and New Mexico's history for many years. Thank you for your time.
