Comments: I urge the Forest Service to complete a full Environmental Impact Statement for the construction of the proposed "Mountain Coaster" in the Sandias. I foresee no scenario in which the coaster causes a "minimal amount of new disturbances" to the surrounding landscape, and its potential impacts should be fully considered. The public deserves to understand the cumulative impacts of this project, including but not limited to: increased traffic, litter, noise/light pollution, and harm to wildlife. Most importantly, the Forest Service must meaningfully consult with the Pueblo of Sandia about this use of their land before taking any actions.
