Comments: Hello,

I am respectfully asking for a longer review period, a full submission of this project for Environmental Impact, and a greater weight to be placed on the desires of the indigenous peoples who have been caring for this land since time immemorial. This land is sacred to the people who first inhabited this land, and this should far outweigh the need for this tourist attraction. Finally, trying to skirt a fuller Environmental Impact report is shady and immoral. Why wouldn't you want to know the impact of the project in the first place, before doing irreparable damage to the area?
