First name: Stuart

Last name: Watts

Organization:

Title:

Comments: We need to come together to protect our lands. We have so few of them, and it is so important to the future health of our children. We must seek all environmental approvals prior to any project. We are just recovering from the damage to our Public lands from the Trump administration. It is now time to make the difference with more respect to the sensitive nature of nature herself. Please slow down on the the Mountain Coaster project, and do what is right.

We need quiet in our forests. Not overcrowding. Thank you for your support to not go forward with this project, or at least get the necessarily needed approvals that keep our environment safe for the future.
