Comments: I oppose the construction of the rollercoaster in the Sandias. Before any sort of construction or plans of any sort that affect the land, the Pueblo of Sandia people should be contacted and included and their decisions must be respected as this is sacred ancestral land. Furthermore the construction of such a magnitude would affect the natural wildlife and the environment, and the increase in tourists would further exacerbate the problems the construction initially caused, with traffic, contamination, littering and destruction of land and wildlife.
