Comments: I think a coaster would not be a good addition to the Sandias because the area and trails of the mountain are already littered with trash and waste. Creating more tourist-y attractions in an area where people go to enjoy nature, will cause the mountain to get run down much more easily, and take away from the natural beauty of the Sandias. Instead of promoting areas that people can hike, run, bike etc, you want to throw money at altering the environment and I don't think that is going to be most beneficial to the people in our community who want to enjoy the natural beauty of our community.
