Title:

Comments: This is an unnecessary and ecologically harmful, ludicrous plan and we should not even be entertaining a mountain rollercoaster on critical habitat area. The major uptick in traffic and the ensuing ecological footprint alone, not to mention the construction and operation itself of the carnival ride, makes this an unviable and irresponsible project to even consider. Please quash this proposal before it goes any further. In solidarity with our animal and plant relatives and the Sandia Pueblo and other indigenous peoples of this place, I urge you to nix this project and not even entertain proposals of the sort moving forward. Thank you.
