Comments: I do not agree with a roller coaster on the sandia mountains when pueblos here still do not have water, good living conditions and even beds! It is hard to get out of being in a bad place when you are in such a bad place. Not only this, but the mountain would become littered, it is a good mountain as it is. The wildlife here on the mountain are already struggling , this would increase their struggles. The crowds of people would trample vegetation,(Not all people follow rules of staying on a trail) which already has a hard time growing as we are already struggling with water here. I do not see why a rollercoaster would be built when there are so many, many more problems in this poor state that the money could be used for.
