Comments: I do not agree with a roller coaster on the sandia mountains when pueblos here still do not have water, good living conditions and even beds! It is hard to get out of being in a bad place when you are in such a bad place. Not only this, but the mountain would become littered, it is a good mountain as it is. The wildlife here on the mountain are already struggling, this would increase their struggles. The crowds of people would trample vegetation,(Not all people follow rules of staying on a trail) which already has a hard time growing as we are already stuggling with water here. I do not see why a rollercoaster would be built when there are so many, many more problems in this poor state that the money could be used for.
