Comments: Dear Cibola National Forest,

I am writing in regard to the proposal to provide a categorical exclusion for the Sandia Peak Ski Area Mountain Coaster. This project places the coaster in close proximity to valuable designated wilderness areas that could be directly impacted. In order to understand the impact this project will have in terms of noise, visually taking away from the wilderness area, and harming wildlife, a full environmental review is necessary. Other considerations such as the road capacity and fire risk must also be considered. The review process has been designed exactly with these issues in mind. Please don't forgo this process and provide an exemption. Instead, make sure we end up with the best result by requiring a thorough and complete review.
