Comments: I would like to go on the record as opposing this project due to its lack of an environmental assessment and the potential disturbances to the character and quality of the land and the surrounding area. The public demand for a project of this scope is suspect at best, and the detrimental aspects far outweigh the benefits. We would lose skiing access, trails would need to be re-routed, and the landscape would be forever blighted with a conspicuous roller coaster. Why on earth do we need to devote 1% of the Sandia to this project? I hope sensible voices prevail here.
