Comments: I am speaking out in opposition of the proposed Sandia Peak Ski Area Mountain Roller Coaster #56985. This is a classic example of outdoor recreation being prioritized over Pueblo nations having the right to their ancestral lands.

This roller coaster will have long term environmental impacts if it is built: this type of recreation will increase the traffic exponentially through this land, which will negatively affect the wildlife, the watershed, mountain and forest. This roller coaster will cause an unnecessary amount of traffic, noise pollution, litter and irreversible damage to the land. Building this roller coaster will only perpetuate systemic racism, white supremacy and colonization of indigenous lands.
