Title:

Comments: I strongly oppose this project for a number of reasons. First, it is my understanding that this project would be excluded from an environmental assessment or environmental impact statement. I can't believe a project for a roller coaster in the Sandia Mountains would be exempt from such important work to understand the environmental impact of the project. Furthermore, it is unclear whether the Pueblo of Sandia has been consulted about this project. This mountain is sacred to their community, and their input should be of top consideration. Finally, a roller coaster is an absurd proposal for such a beautiful part of nature. It would destroy what people come to the mountain for, the nature. Please do not move forward with this project.
