Title:

Comments: There needs to be cumulative impact studies or understanding on how this will affect the mountain and forest area in the long run. This type of recreation would bring an increased amount of traffic to the peak and could have adverse environmental impacts to the entire watershed and wildlife. Noise pollution, increased litter, and other types of contamination could occur because of increased recreation. Moreover these are ancestral lands, without the consent of the people to whom this land is ancestral, this is straight up theft.
