Title:

Comments: As someone who hikes in the Sandia Mountains, I know how precious this land is. This land has allowed us to explore the outdoors by foot, with our furry companions and human friends and family. Over time there has been more development such as the skii area, the tramway and the restaurant located at the peak of the mountain. We must protect this land. Rollercoasters can be built within city limits and not in the middle of the woods where so many wild animals live. Thank you
