Comments: This project is both offensive and absurd. This area is sacred to the Tiwa people, it has already been taken from them by the outdoor recreation community, this idea would impact the ability of all communities to enjoy the magic of this natural landscape. Building a roller coaster on a sacred mountain, on stolen land is so incredibly insulting, sacrilegious, and tone deaf. Not to mention the detrimental impacts on the environment in this fragile ecosystem, Wildlife, waterways, and ability of all to experience this beautiful place unmarred by noise pollution, construction, and over saturation of visitors. National parks are meant to preserve nature for all to enjoy, not to become Disneyland.
