Title:

Comments: This roller coaster is a direct violation to the earth and the Indigenous people who live in this area. The construction and the influx of visitors will drastically impact the dynamics of this area. Plants, animals, soil, and people will all be negatively impacted. This is incredibly disgusting that something like this would even be proposed. Indigenous people are seen and disposable and it absolutely benefits settlers to erase Indigenous people and what they know to be sacred. It should be enough that this area is sacred. Why are further comments or arguments even being taken into consideration??? Do the right thing, stop being violent.
