Comments: This is a church. This land is sacred, holy, concecrated. The proposal claims that the coaster itself will have little impact on the ecology, but there will be heavy machinery brought in to build; access roads will need to be cut; and the presence of the coaster may increase traffic in the area; all of which will disturb the wildlife and the envoronment. Not only is this violating the religious freedom of residents, it will permanently degrade the quality of the park itself. I encourage you to prevent this from happening.
