Title:

Comments: I am commenting on the Sandia Peak Ski Area Mountain Coaster Project, which I oppose. I believe this type of structure and recreation would greatly disturb the otherwise peaceful and serene environment that draws visitors to the mountains in the first place. Albuquerque already has amusement parks but there is a finite amount of nature to be enjoyed so close to the already bustling city. One of the greatest things about the Sandias is the quite and stillness. People screaming on a rollercoaster would not just disturb the ecosystems with its noise but any body in the area. The building of this rollercoaster would displace local wildlife and create even more pollution with the presence of people. We should be looking for ways to preserve the ecosystem of the mountains instead
