Comments: I support the addition of a Coaster to the Sandia Peak Area. The Coaster will be in the previously disturbed area that includes the ski area. It will bring more visitors to the area improving the economy. It will help diversify the activities available in the Forest to help sustain the ski area as the impacts of climate change continue to get worse. It will help more people experience the beauty of nature, hopefully resulting in a better appreciation of nature, so they will want to protect it.
